

MV NETWORK UPDATE DECEMBER 2023

February 2024 will see New Zealand Insulators celebrate 100 years of business in NZ as we continue our 100-year history of proudly supporting the New Zealand electrical industry.

NZI continues to manufacture in Temuka South Canterbury, the quality of the local product is a result of 100+ years of manufacturing expertise built up by the company and staff.

All NZI branded porcelain insulators are made of the unique Kakahu blend of clays, sands and mixing agents sourced direct from NZI's "owned and operated" quarry. They are also manufactured with a glaze that helps to prevent flash-overs, by promoting self-cleaning and also enhancing mechanical strength. All medium voltage insulators are supplied standard with the addition of our high specification "Blue Radio Silence" glaze to assist in the reduction of radio interference.

NZI continues to build on a reputation for reliability and durability first started in 1924. Our re-investment in the Temuka factory, plus the continued increase in staff numbers year on year helps us prioritise making customers the focus of our business, whilst expanding our globally based agency product range. This is all underpinned by our continued focus on ISO9001-certified quality manufacturing systems assuring our customers of their wisdom when choosing NZI performance and quality.

International research shows that the price of porcelain insulators is typically only 3% to 5% of the cost of installing a new overhead line, but 90% of the faults that are likely to occur on that line will be caused by insulator failure.

The only way to minimise risk and cost is to utilise insulators with the highest quality manufacturing practices and the highest quality glazing. NZI provides this manufacturing surety and more by offering a 25-year warranty on our NZI manufactured porcelain.

NZI 2024 CATALOGUE – CENTENARY EDITION

- > New look, new layout, easy to use index
- > Updated and increased range
- > A5, 156 page MV & LV catalogue
