

NETWORK UPDATE MARCH 2012

Positive news.

NZI's new Auckland Branch is up and running. From 11 Wookey Lane, Kumeu – we're distributing the bulk of our North Island clients' stock deliveries ex Auckland.

Visitors welcome. Go west – 16mins from Spaghetti Junction, motorway extension now open.

NZI has just released a new AX Aluminium Clevis Thimble (Part Number 536342, catalogue page 20). It's a one-size-fits-all solution dimensioned to fit all preform/deadend sizes. Internal dimensions - 31mm width, 50mm height and 57mm diameter. Ask one of us for a sample.

We're also now offering an AX 'Pin Only' for Clevis Thimbles

(Part Number 536431) with stainless steel split pin. You'll be able to recycle used Clevis Thimbles which have lost/damaged their pin.

Launching soon – NZI's new porcelain 22kV Tie Top Line Post (Part Number 464619), page 8 in our 2012 catalogue. 490mm creepage, 10kN, 32mm groove, 9.0kg, 40/pallet. Samples, test certificates and drawings – all available during April.

Greg has just been up visiting DTR Electric in Busan (Korea). They run a world-class factory producing premium polymer products. Line Posts, Strains, Station Posts, Arresters, Standoffs and EDO. The DTR 'quality-for-the-price' value equation is compelling.

NZI is working with several Networks to complete approvals for the DTR Surge Arresters – 12kV, 15kV, 18kV, 45kV. Class 1 & 2. Full CESI test certification available.

Ironically for a company specialising in MV, with a pedigree in supplying fuselinks – NZI has not previously carried an extensive range of (12kV) HRC MV Fuselinks.

That's all changed – see catalogue pages 58-61 for the entire Cooper Bussmann MV Fuselink offering. Oil, Air, Backup and Full Range. In stock at NZI.

Reminder – NZI is now distributing Avon line hardware ex Temuka and Auckland warehouses.

Avon Eye Bolts, Crossarm Braces, U Shackles, Shackle Straps, Crucifix Frames and Earth Rods. NZI catalogue page 19.

And finally, we're very pleased to have Brian Stephens joining NZI, moving from Christchurch to Temuka as our Technical Ceramist. This highly-specialised role is vital for NZI and Brian is a welcome addition.

On several fronts, we're making progress
