

**NETWORK UPDATE
JULY 2012**

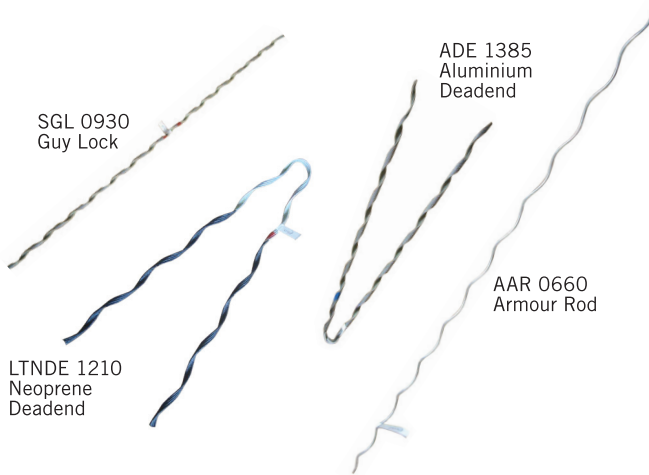

Positive news.

Payer preforms – manufactured in Canada, are being made available once again to NZ networks.

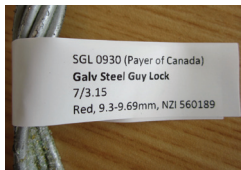

Widely approved in NZ and recognised as a premium product, Payer preforms were previously supplied under another brand up until 2011.

NZI have been appointed as the exclusive NZ distributor for Payer product – starting late August for contractors to one specific network, and then gradually offered on a wider basis.

It's 'back to the future' with Payer preforms through NZI. The old coding protocol reinstated, the NZ colour system is back.

And Payer's waterproof label (pictured) maps out the information linesmen and stores require.

In stock at NZI from September on. Samples, drawings and test reports available. Payer launch brochure releasing in August.

Call David, Dan or Greg to get Payer preforms back on your network.
