

MV NETWORK UPDATE MAY 2021

Only New Zealand Insulators (NZI) porcelain is 100% recyclable by NZI. At our Temuka site we manage the total lifecycle of insulators that we manufacture and as part of this we continue to offer recycling of NZI porcelain (free of charge) in our Temuka factory.

Since we are the only porcelain insulator manufacturer in the Southern Hemisphere, we are uniquely positioned to help you manage your sustained environmental impact by utilising our recycling process.

NZI manages the natural materials and components to guarantee the quality of the NZI product and therefore we are able to provide surety of quality by offering a 25-year warranty on our NZI manufactured porcelain. This includes offering the total life cycle management/recycling of NZI-only porcelain insulators.

So it's obvious – to minimise the risk and reduce total life costs, the recommendation is to utilise insulators with the highest quality manufacturing practices and only those that are able to offer 100% recycling at end of life.

It's no wonder our customers agree that NZI is a great value proposition for the sourcing of quality

insulators and providing an environmentally sustainable, total lifecycle management solution that can't be replicated by other manufacturers.

Contact us to find out more on how NZI can recycle your old insulators and improve your network reliability and carbon footprint.

New Zealand Insulators proudly made in Temuka, South Canterbury, New Zealand.

Contact us now for information on our products, to receive samples, and/or request a quote on any of our NZI or agency products.
