

Earthquakes, Floods, Fires, World Wars, Depressions, Pandemics, you name it...

Nothing is stopping New Zealand Insulators!

We've continued to manufacture porcelain insulators in Temuka South Canterbury for the New Zealand and many global markets since 1924. **Yes, that's more than 100 years.**

During September, at the 2024 EEA (Electrical Engineers Association) Conference in Christchurch (less than 2-hour drive North from NZI HQ and Temuka factory), the NZI team had the opportunity to show off our 100 years of manufacturing history with a display including some of the old advertising posters and historical insulators from years gone by. We also provided conference attendees with some of our NZI 100-year memorabilia items as a celebration of an achievement very few could ever dream of.

Proudly Supporting the New Zealand Electrical Industry

100 Year Celebrations Photo Gallery

We are proud of retaining local manufacturing knowledge and abilities gained over the last 100 years. It doesn't come easy but signals our strength and determination to continue to grow now and into the next 100 years and beyond.

New Zealand made NZI porcelain is a great "total value proposition" for the sourcing of quality insulators and provides a sustainable environmental, total lifecycle solution which can't be replicated by any other insulator supplier in New Zealand. Along with this, of course, every NZI insulator is tested mechanically or electrically and all NZI branded insulators are protected by our 25-year NZ manufacturer's warranty.

How does NZI make insulators?

To find out more on how NZI can recycle your old end of life insulators and improve your network reliability, contact us.
