

Fulton Wedge Clamp

The one-size-fits-all 25 mm to 70 mm wedge clamp from Fulton Industries is now available for country-wide distribution from New Zealand Insulators and is type-approved on major North Island and South Island networks.

The Australian manufactured Fulton earth clamp is a convenient one-size wedge clamp solution for conductors ranging from 25 mm² to 70 mm² and a cost-effective alternative to carrying both 25 mm² to 50 mm² and 50 mm² to 70 mm² earth clamps.

Packaged in boxes of 25 units, the Fulton wedge clamps are available in large numbers ex stock from New Zealand Insulators'

Temuka and Auckland warehouses.

The Fulton wedge clamps feature copper alloy ETP construction and a long lasting 304-grade stainless steel shear bolt for proven reliability.

The product is well proven in

Australia where it is the incumbent earth clamp solution utilised by one of Australia's largest electricity network providers.

A key benefit for network contractors is reduced stock lines required to be held in stores.

– David Glackin, NZI

Features

- One-size-fits-all convenience
- Type-approved by major network companies
- Reduced stock holding
- Quality engineering and construction
- Incumbent product in Australia
- Convenient 25 unit packaging
- Overnight delivery
- Short circuit tested – 13.1 kA for 1 second
